

**LET'S
CHANGE
THE WAY
WE SPEAK
EFFICIENCY**

Lowara Smart Pump Range

PERMANENT MAGNET MOTORS WITH EMBEDDED DRIVE AND
HIGH-EFFICIENCY HYDRAULICS

 **LOWARA**
a xylem brand

Thinking efficiency? Start with smart systems.

It's time to think beyond single components.

For top efficiency in residential and light industrial water supply and HVAC applications, you need the right combination of motors, variable speed drives and pumps – ensuring reliable performance, maximum savings and a rapid return on investment.

You need the Lowara Smart Pump range.

Applications

- Residential
- Light industrial
- HVAC
- Booster set
- OEM

A complete system delivering market-leading efficiency

The Lowara Smart Pump range incorporates state-of-the-art technology to optimize performance, communicate with other building systems and help you achieve your goals. Choose preprogrammed packages for easy, cost-effective installation – and benefit from this system’s power, intelligence and performance.

POWER: BEST-IN-CLASS IE5 MOTOR

Technical Specification IEC/TS 60034-30-2 introduces “ultra-premium” IE5 efficiency performance. It’s the top efficiency level for motors designed to not operate directly on-line. Each Lowara Smart Pump is equipped with a permanent magnet motor that meets this IE5 standard, providing efficiency well above a standard IE3 asynchronous motor.

INTELLIGENCE: EMBEDDED MOTOR DRIVE

The smart, easy-to-set integrated drive can operate single, twin or multipump systems of up to three pumps, with no need for an external control panel or PLC. The drive matches performance to demand, reducing energy use. And it allows smart pumps to communicate with other building systems in real time, maximizing efficiency.

PERFORMANCE: ROBUST PUMP RANGE

A full line of single-phase pumps provides enhanced hydraulic performance for residential, light industrial and OEM applications. The Smart Pump range can easily handle extreme environments, from -20°C to 50°C, without derating performance.

SPECIFICATIONS:

Voltage: 208 to 240V

Power: up to 1.5 kW

Multipump capability: up to 3 units

Power supply: single phase 50/60 Hz

Comms: BACnet and Modbus standard in single pumps

IES2 package with IE5 motors

Enclosure rate: IP55

Ambient temperature: -20°C / +50°C full power

EMC: C1-category compliant with EN 61800-3 for residential environment

Harmonics: compliant with IEC/EN 61000-3-2

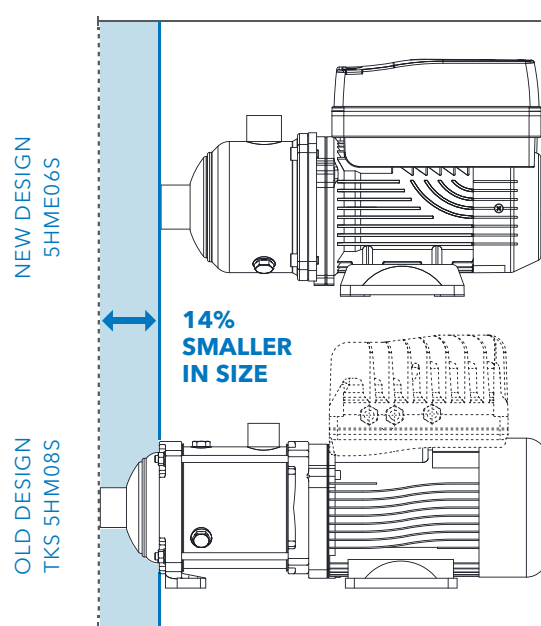

EXTENDED WORKING PERFORMANCES

Smart hydraulic curve vs. previous solution with TKS

The embedded electronic drive called “e-SM” dramatically extends the working area of a pump to maximize flexibility and enhance system design. When coupled with multistage pump technology like e-HM, e-SV or VM, it presents a compact footprint, making it suitable for tight-space installations.

Compare the Smart Pump footprint (NEW DESIGN) to the previous solution with TKS (OLD DESIGN). The Smart Pump offers higher performance with a reduced footprint.

Added Smart Pump benefits

Discover the great trio of efficiency

Lowara Smart Pumps combine three essential elements to ensure outstanding reliability, optimal savings and the shortest payback times. It's not about individual components. It's about a great team of three perfectly concerted elements:

- Ultra-premium IE5 motors for best-in-class efficiency, according to IEC 60034-30-2
- Power drive system (drive and motor) in the highest efficiency class, IES2, according to IEC 50598-2
- Hydraulic pump designed for exceptional Minimum Efficiency Index (MEI) ratings, according to EU Regulation No. 547/2012

Enjoy plug-and-play ease

The all-inclusive Lowara Smart Pump range is easy to install and commission in new or retrofit applications. Standard BACnet and Modbus capabilities ensure quick connectivity and seamless integration with your building management system.

Meet 2020 standards today

Be ready now for the 2020 European Union Ecodesign Directives (EN 50598) on water supply and HVAC products. The Lowara Smart Pump range already meets the performance standards expected to be enforced in 2020 for the total pump system. What's more, the combined power drive system has achieved the highest IES class, IES2, according to IEC 50598-2. It's designed to work as a complete, integrated solution – so you can meet energy and operating efficiency goals today and tomorrow.

Lowara offers the most efficient smart pump system to meet the EU's Extended Product Approach standard.

Controls, safety features and monitoring tools

Available control modes include:

- Control for constant pressure
- Control to match a system curve
- Control according to an external signal

In addition to these regulation functions, the Smart Pump range also:

- Stops the pump at zero demand
- Stops the pump in case of water failure
- Allows protection against dry running
- Has failure and over-temperature sensors for both the inverter and motor, which protects the pump and motor from under- or over-voltage

The Smart Pump range offers a complete set of supervision and metering tools such as automatic test starts, auto smart cyclic change of lead and lag pump units, a memory for any inverter fault signals, and an operating-hours run counter. There's no need to configure the product; all the listed features are already included in the standard package.

Control for constant pressure

Control to match a system curve in multistage Smart ranges like e-HME, e-SVE, VME

Control to match a system curve in in-line Smart ranges like e-LNEEE, e-LNESE

Control according to an external signal

Why are filters needed?

If your smart pump is installed in a room with many electronic devices, and it has no THDi or EMC filters, computer monitors could start flickering uncontrollably. Filters eliminate such disturbances.

HARMONICS FILTERS

Harmonics are produced by any device that uses a rectifier-based power supply, which draws current in non-sinusoidal curves: radio, TV, computer, washing machine, microwave oven, etc. Harmonics can reduce pump reliability, affect performance quality and increase operating costs. Each Smart Pump comes with a built-in total harmonic distortion current-active filter (THDi). This cuts interference to the minimum, less than 5%.

ELECTROMAGNETIC FILTERS

The embedded electromagnetic compatibility filter (EMC) in each Smart Pump minimizes the transfer of electromagnetic noise between the drive and power supply mains. The range is fully compliant with the EN 61800-3, C1-category product standards that apply to domestic premises, buildings and facilities directly connected to a low voltage (e.g. 230V) main supply.

Smart pumps for pressure boosting

Smart Pump range

Smart Pumps are not only smart. They're smooth. They operate steadily in partial loads, which prevents the water hammer that's normally associated with full speed pumps. What's more, their accurate speed control during operation and their smooth start-up reduce mechanical stress and wear.

Available in single phase from 0.37 to 1.5 kW, Smart Pumps are easy to commission, set up and operate using the simple start-up menu. Parameters and alarms appear on an easy-to-read display designed to provide complete control of system operation. They're easy to program too, with just three keypad touches.

Each Smart Pump features an IE5 motor for best-in-class efficiency and enhanced hydraulic performance. The range has an IP55 enclosure rate, and includes BACnet and Modbus capability for seamless building management system integration in all stand-alone configurations. The drive is suitable for installations from -20°C to 50°C without power derating.

APPLICATIONS

- Water boosting supply systems in residential buildings and homes
- Irrigation small to medium
- Light industrial
- Air conditioning
- Water treatment plants

e-SVE

Vertical multistage stainless steel pumps

e-HME

Horizontal multistage pumps

Three phase coming soon!

e-HME: Ensuring a reliable water supply

This robust line of smart pumps combines state-of-the-art hydraulics with best-in-class efficiency for the lowest possible operating costs. Five ranges offer flexibility for a wide range of applications. They include residential and commercial pressure boosting, industrial and HVAC, and irrigation.

- IES2 drive with permanent magnet motor for top efficiency
- More compact than the fixed-speed version, meeting the same duty points with precision and consistency
- Thick stainless steel casing, high-quality bearings, and stainless steel inner components minimize noise and guarantee long service life
- Certified for drinking water use (WRAS and ACS)
- Options include AISI 304 or 316 pump body and inner components, electropolished and passivated, and mechanical seal or O-rings

SPECIFICATIONS:

Delivery: up to 29m³/h

Head: up to 155m

Liquid temperature: up to 120°C

Pressure: PN16

Power range: 0.37-1.5 kW single phase 208-240V

PERFORMANCE CURVE:

Smart pumps for pressure boosting

e-SVE: Stainless steel vertical multistage pumps

Smart high-efficiency hydraulics yield the lowest possible operating costs for a variety of applications, including residential and light commercial, OEM applications and HVAC. Six ranges offer multiple construction designs, with special versions available.

- IES2 drive with permanent magnet motor for top efficiency
- More compact than the fixed-speed version, meeting the same duty points with precision and consistency
- A variety of connections (threaded, round, clam and oval flanges, Victaulic) configured vertically; ports can be on the same side to save space
- Designed for fast, easy maintenance with a balanced mechanical seal, an O-ring seat design and a replaceable diffuser wear ring
- Reduced impeller axial thrust for longer standard motor bearing life
- Certified for drinking water use (WRAS and ACS)
- Options include high-temperature seals, low NPSH design, high pressure design, and passivated and electropolished versions

Three phase coming soon!

SPECIFICATIONS:

Delivery: up to 30m ³ /h
Head: up to 180m
Liquid temperature: up to 120°C
Pressure: PN25
Power range: 0.37-1.5 kW single phase 208-240V

PERFORMANCE CURVE:

At Brown Brothers Engineers, we have a whole range of variable speed drives and booster systems available for any application.

- SteadyPres booster systems
- Hydrovar single and dual booster systems
- Custom multiple pump systems

Xylem |'zīləm|

- 1) The tissue in plants that brings water upward from the roots;
- 2) a leading global water technology company.

We're a global team unified in a common purpose: creating advanced technology solutions to the world's water challenges. Developing new technologies that will improve the way water is used, conserved, and re-used in the future is central to our work. Our products and services move, treat, analyze, monitor and return water to the environment, in public utility, industrial, residential and commercial building services, and agricultural settings. With its October 2016 acquisition of Sensus, Xylem added smart metering, network technologies and advanced data analytics for water, gas and electric utilities to its portfolio of solutions. In more than 150 countries, we have strong, long-standing relationships with customers who know us for our powerful combination of leading product brands and applications expertise with a strong focus on developing comprehensive, sustainable solutions.
